President of Sri Lanka

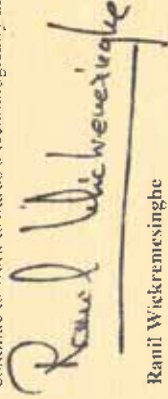

MESSAGE

Ever since its inception in 1998, the National ICT Award (NBQSA) has long been a symbol of Sri Lanka's commitment to fostering innovation and excellence in the Information and Communication Technology (ICT) sector. In the context of the Government's "DIGIECON 2030" initiative, NBQSA plays a pivotal role in the journey towards an inclusive digital economy. The "DIGIECON 2030" program is designed to accelerate Sri Lanka's economic growth by leveraging advanced technology-based solutions.

The National ICT Awards aligns seamlessly with the objectives of "DIGIECON 2030". It has been and continues to be, a beacon for nurturing the talents of the country's youth, by providing a platform for their innovative ICT ideas to flourish, and recognizing innovative products developed by the ICT Industry of Sri Lanka. In this context, the unparalleled role offered by NBQSA to nominate the best ICT products in the country to compete at APCTA - widely recognized as the OSCAR's of the ICT industry in Asia, is laudable. It is gratifying to note that Sri Lanka has been performing exceptionally well in this Asia Pacific competition in recent years.

The National ICT awards program not only celebrates excellence but also fuels inspiration, innovation, and the pursuit of cutting-edge solutions. As the organizers, the British Computer Society (BCS) the Chartered Institute for IT Sri Lanka's dedication to recognizing and celebrating outstanding achievements within the nation's ICT landscape, is extremely commendable. The contributions by all the stakeholders of NBQSA, including the Ministry of Technology and the ICT Agency of Sri Lanka are also appreciated. Undoubtedly their commitment is integral to the success of this National Awards Ceremony and the realization of a prosperous, digitally-driven Sri Lanka.

I extend my best wishes for a successful National ICT Awards, NBQSA 2023, and congratulate all the winners. I am confident that the award recipients and NBQSA will continue to work towards a technologically advanced Sri Lanka.

Ranil Wickremesinghe
President

Democratic Socialist Republic of Sri Lanka

23rd October 2023

இலங்கை குடியரசின் சமூகியல் குடியரசு
Democratic Socialist Republic of Sri Lanka

Congratulations to all the Award Winners!

Leading the Digital Transformation Revolution

Innovate. Connect. Transform.

Message from the Hon. State Minister of Technology

Hon. Mr. Kanaka Herath
State Minister of Technology

It is my pleasure to write this brief message on the occasion of 25th National ICT Awards, (NBQSA) organized by the British Computer Society. I am very grateful and appreciative on the efforts of BCS over the years in bringing the ICT sector together and being the emblem of Sri Lanka's dedication to fostering innovation and excellence within the Information and Communication Technology (ICT) sector. In the context of Ministry of Technology's "DIGIECON 2030" initiative, NBQSA holds a pivotal role in the journey towards an inclusive and digitally driven economy.

The "DIGIECON 2030", initiated by the Ministry of Technology, is strategically designed to accelerate Sri Lanka's economic growth by harnessing advanced technology-based solutions. It encompasses a comprehensive digital master plan, a regulatory policy framework, and a series of annual events aimed at nurturing a robust digital ecosystem. It is great to see NBQSA seamlessly aligning with the vision of "DIGIECON 2030," and it is an integral part of our national strategy for digital transformation.

As we have lined up a series of showcase events during the months of October and November this year, we are proud to announce that NBQSA will play a significant role in fueling innovation and excellence in the ICT sector as we work towards our goal of achieving a more inclusive digital economy.

One of the remarkable contributions of NBQSA is its role in nominating the best ICT products in our country to compete at APICTA, an event widely recognized as the "Oscars of the ICT industry in Asia." Sri Lanka's exceptional performance in this Asia Pacific competition in recent years reflects the extraordinary potential and the achievements within our ICT industry.

The NBQSA awards not only celebrates excellence but also serves as a source of inspiration, driving innovation and encouraging the pursuit of cutting-edge solutions. As the ministry of technology, we have given the fullest support to BSC and appreciate the dedication of the volunteer team of BCS, The Chartered Institute for IT Sri Lanka Section. Further, I must applaud the contributions of all stakeholders both from the Public and Private Sector for your commitment and dedication which is an integral part to the success of this prestigious awards ceremony, and realizing our vision for a prosperous, digitally-driven Sri Lanka.

I extend my best wishes for a successful NBQSA event, and I look forward to witnessing the extraordinary accomplishments and innovative solutions that will further our nation's progress in the dynamic world of ICT.

A man in a dark suit, white shirt, and red tie is shown from the chest up. He is wearing dark sunglasses and has his mouth wide open as if shouting. His right hand is raised in a 'stop' gesture, with all five fingers spread. The background is dark and out of focus.

Message from the Chairman of BCS Sri Lankan Section

E. Alanzo Doll
Chairman
BCS The Chartered Institute for IT - Sri Lanka Section

I am honoured to compose this message as Chairman of 'BCS' The Chartered Institute for IT Sri Lanka section during this 25th anniversary year of the National ICT Awards (NBQSA).

Technology plays a pivotal role in shaping our future, and we at BCS Sri Lanka section are privileged to be tasked with organizing this event on behalf of the ICT industry of Sri Lanka. In this 25th Anniversary year, we have joined hands with DIGIECON 2030, the National Digital Economy acceleration initiative spearheaded by the Government of Sri Lanka and initiated by the Ministry of Technology to further facilitate the achievement of the country's social and digital economic growth objectives.

Ever since its inception, the National ICT Awards (NBQSA) has been the catalyst in promoting quality ICT products developed in Sri Lanka, by benchmarking them against global industry standards and best practices. The competition also fosters innovation by encouraging companies to develop innovative and cutting edge products that are competitive in the international marketplace.

There are over 40 categories for commercial organizations, tertiary students, postgraduate students, and groups or individuals to compete in. In addition to the gold, silver, bronze, and merit awards that are awarded to the best ICT products, special awards are presented in recognition of outstanding achievements of individuals and organizations in Sri Lanka who have contributed to the development of the ICT industry in the country.

Winners of the competition are nominated to represent Sri Lanka at the Asia Pacific ICT (APICTA) Awards, which will be held in Hong Kong this year in the month of December. Participants at the APICTA awards are further given an opportunity to get enrolled for business matching services provided among the APICTA member countries, which facilitates Sri Lankan companies to connect with potential clients, investors and business partners.

Organizing an event of this magnitude is not an easy task and needs meticulous planning and execution. I wish to appreciate the tireless efforts of the organizing committee, sponsors and volunteers who contributed to the success of this event.

Finally, I would like to congratulate all winners at the National ICT Awards 2023 for their remarkable accomplishment and wish you continued success, innovation and excellence in all your future endeavors.

Message from the Secretary of BCS Sri Lankan Section

Sanjeeva Perera
Secretary
BCS The Chartered Institute for IT - Sri Lanka Section

"The only way to define your limits is by going beyond them."
Arthur C. Clarke

This year, National ICT Awards-NBQSA celebrates the Silver Jubilee, marking 25 years of continuous and tireless service to the ICT Industry in Sri Lanka. The team who carried this national responsibility throughout all these years, always challenged their limits. That is the secret behind the success of NBQSA, and every year, we strive to increase the level of standard to be in par with the internally acclaimed standards as we recognize the best of the best in Sri Lankan ICT industry. I am indeed honored and proud to be a part of this journey for over 14 years playing many different roles. Today I am penning this note as the Secretary, BCS The Chartered Institute for IT Sri Lanka Section. Throughout the years, we have witnessed remarkably increasing standards set out by our participants and their products reaching greater heights both locally as well as internationally.

Being the pioneer award ceremony in the country, NBQSA has many followers. That itself is a significant achievement. Event of this caliber would never reach to a great height in success without the dedication and commitment from the NBQSA team members who tirelessly worked over two decades voluntarily. I must salute them for their contributions for uplifting the NBQSA as country's longest and oldest event which has the highest quality and recognition throughout.

This magnificent event will certainly be an evening to remember for all the winners since this will definitely open a new window to their lives with numerous opportunities. While congratulating them whole heartedly, I warmly encourage others who could not be among winners this year to do better next time.

At last, but not least, I would like to take this opportunity to thank each and every one who contributed to this national endeavor to reach this great height from the inception. I wish NBQSA many more years of success!

With Best Compliments

A complete enterprise solutions provider with an extensive portfolio that includes infrastructure platforms, cyber security solutions, managed services, automation, and cloud services.

Message from Chairman - Panel of Judges

M.G. Tillekeratne
Chairman - Panel of Judges
National ICT Awards 2023

It is with great pleasure that I send this message as the Chief Judge for the NBQSA, National ICT Awards 2023 competition to be held on 25th October, 2023. This national awards programme is celebrating its 25th Anniversary this year. Jointly organized by the BCS the Chartered Institute for IT - United Kingdom and BCS Sri Lanka Section and branded as NBQSA, this is the only national level ICT competition in the country, which is primarily aimed at recognising and encouraging the entities and personnel from the entire local ICT industry for technology innovations.

This year's competition was open for nominations for total of 45 award categories that included 27 commercial solution categories grouped into 8 head categories, 3 student categories, 4 technology categories and 11 special award categories. There were 123 nominations for commercial categories, 28 for student categories and 44 for special award categories. All entries were evaluated using the NBQSA judging criteria which is based on recently revised Asia-Pacific ICT Awards (APICTA) judging criteria. Almost entire judging process was conducted in a judging venue where all nominees were able to present their products in front of experienced judges who were selected both from the ICT industry and Academia. The "i-Judge" online judging system built by the BCS(SL) was used for the evaluation of the products.

The Winners' Circle was published about two weeks ago and their respective awards will be announced and presented to them today during the National ICT Awards Night which is expected to be graced by the HE the President of Sri Lanka. All nominations in commercial and tertiary categories have the opportunity of winning a category Gold, Silver, Bronze or Merit award if respective qualifying score levels are achieved and the best three products among the category winners will be awarded the prestigious Overall Gold, Silver and Bronze awards. Main category award winners also have the opportunity of winning the optional technology based special awards. Apart from category specific awards, a number of special awards jointly awarded by BCS-SL and a few partnering organisations are also presented at this competition. The "Best Student ICT Entrepreneur" award is jointly awarded by BCS-CIIT and Computer Society of Sri Lanka in order to recognize and encourage local ICT entrepreneurs. The "Public Sector Most Outstanding ICT Achievement" award is to be awarded in association with ICTA to an eligible government Organisation to recognize its contribution towards serving the public using ICT innovations. "Most Outstanding Innovation to address National Disasters" award is to be presented in association with Sri Lanka Inventors Commission and the "Best Digitalization Process Enabler" award is to be awarded by the Lanka Clear Pvt. Ltd. The "Best Application Using Cloud Technology" award is sponsored by LK Domain Registry. The "Lifetime Achiever's Award/Most Outstanding ICT Contributor Award" is presented to an eminent person in recognition and appreciation of the yeomen services rendered by him for the development of ICT industry in Sri Lanka. Also, an award namely "Best Students' Research Project of the Year" in association with IEEE Computer Society, Sri Lanka Chapter is to be awarded.

This year, the Asia Pacific ICT Alliance - APICTA 2023 competition will be held in Hong Kong in December 2023 and the best products from both NBQSA 2023 with great winning potential will be nominated from Sri Lanka to compete in APICTA.

Lastly, I would also like to take this opportunity to thank all Judges who, despite their busy schedules, volunteered to render their valuable service to make this event a great success and also warmly congratulate all the NBQSA 2023 and APICTA 2023 winners.

TERTIARY STUDENT PROJECTS

(Technology / Business)

This Award is presented to the most innovative ICT software and/or hardware project as specified below from students of Institutions of Higher Learning. Any Information and Communication Technology project or research in the technology area performed by a student or a group of students who are registered as active undergraduate students in a higher-learning institution, such as college or university during the NBQSA Award competition or within 1 year period from his or her graduation date by providing proof of graduation certificate during delivery of the presentation. This excludes Master and Doctorate programs.

POSTGRADUATE STUDENT PROJECTS

This Award is presented to the most innovative ICT software and/or hardware project from students of Institutions of Higher Learning at Master and Doctorate programs. Any Information and Communication Technology project or research performed by a student or a group of students who are registered as active postgraduate students for a Masters or Doctoral programme in a higher-learning institution, such as college or university during the NBQSA Award competition.

RESEARCH AND DEVELOPMENT PROJECT

This Award is presented to the most outstanding ICT R&D project. Any Information and Communication Technology research and development, conducted by academic, non-academic institutions, or individuals to create innovative products, processes, and services; and that such innovations have been completed fully but not yet actively marketed, or are already actively marketed but still no customer or installation, or not been completed but their features and functionalities can be demonstrated.

IN-HOUSE

This Award is presented to the most innovative application of software and/or hardware developed by a company/organization that is implemented 'in-house' in the company/organization for the company/organization's use. The software and/or hardware product can be of any nature (e.g. communications application, financial application etc.).

Ministry of Technology
Sri Lanka

DIGIECON SRI LANKA 2023 - 2030 is a national initiative that aims to leverage advanced technology-based solutions to drive economic growth and create a more prosperous and inclusive future for all Sri Lankans, under the patronage of His Excellency the president Ranil Wickremesinghe & executed by Hon State Minister of Technology Kanaka D. Herath.

We invite all stakeholders in the industry to join us in this endeavor. By working together, we can create a digital ecosystem that is conducive to innovation, entrepreneurship, and job creation.

Ministry of Technology would like to congratulate the BCS Sri Lanka Section for organizing the National ICT Awards for the 25th Year.

Together, we can build a digital Sri Lanka that is a beacon of hope and opportunity for all.

Visit our website to learn more and get involved.
